Herbert W. Franke was born in 1927 in Vienna. He studied physics, mathematics, chemistry, psychology and philosophy, and earned his doctorate at the University of Vienna with a dissertation on theoretical physics. Since 1957, Herbert W. Franke has been a freelance writer. In 1979, he co-founded Ars Electronica in Linz. In 1980, he was elected to membership in the German PEN Club and awarded the professional title of Professor. He is a member of the Graz Authors Congress and has received numerous prizes, including several for the year’s best science fiction novel. His fascinating utopias are based on insights gained in his scientific work. He has earned a place alongside such greats as Philip K. Dick and Stanislaw Lem as Europe’s best-known sci-fi writers. Herbert W. Franke was also one of the first to utilize the computer as an instrument for creative design.
