The Garden of Curiosity - Buenos Aires

A journey through multiverse cultures

A garden can be considered as a particular arrangement of ecosystems that can grow in many expected / unexpected ways due to careful planning and bearing. Initial seeds and land design would grow and shows us the sense of cycles of time and nature development. It engages us with multiple forms and sensations we can't predict in beforehand despite the proposed order.

The word culture refers to cultivating the land in many languages. Our knowledge and social practices could grow in a kind of designed territory with boundaries more or less established; nevertheless growing cultures are always mixed processes naturally.

How could we build an ecosystem for culture growing? Well ...Muntref Arte y Ciencia can be thought of as a diverse ecosystem; a cultural garden that disseminates through vast and multiple flowerbeds. Since 2011, Muntref Arte y Ciencia has been weaving connections not only with people from diverse disciplines, groups of students, different institutions and several technical environments, but also inspirational and empathic relationships have been spread in a growing network. We have created The Garden of Curiosity website as an interactive navigable visualization work through which we aim to share this cultural diversity.

People are invited to scroll down the page and explore diverse objects. By clicking on some specific ones, videos, images, sounds and/or texts will be displayed. Through these different materials, visitors will be able to find and discover the projects, people, relationships and institutions that work with Muntref Arte y Ciencia.

Design Concept:

Mariano Sardón

Lucía Kuschnir

Cintia Ferstemberg

Rocio Pilar de Lara

SWAP Development Manager:

Guillermo Suarez (UNTREF MEDIA)

Developers:

Guillermo Bacigalupo (UNTREF MEDIA)

Jonathan Rikles (UNTREF MEDIA)

Acknowledgments:

Leandro Garber (Untref)
Sebastián Tedesco (Untref)
Jeronimo Bujman (Untref)
Diego De Benedetto (Untref)
Máximo Signiorini (Untref)
Viviana Ramos Di Tommaso
Josefina Schmipp
Diego Shalom (UTDT)
Santiago Villa (Electronic Arts Degree - Untref)
Martín Elias Costa (UBA, FCEyN)

Partners:

Laboratorio de Neurociencia, Universidad Torcuato Di Tella
Laboratorio de Sistemas Dinámicos Facultad de Ciencias Exactas y Naturales, Universidad de Buenos Aires.
INVAP
Fundación INVAP
Crossmodal Research Laboratory - University of Oxford
Volda University College
Centro de Innovación y Desarrollo de Empresas y Organizaciones (CIDEM), Universidad Nacional de Tres de Febrero
University of Turku
Universidad Nacional de Quilmes
Patagonia CNC Machines
