

## Voynich Manuscript in the Ars Electronica Center

It's the world's most mysterious manuscript—a book written by an unknown author, illustrated with images that are as bizarre as they are puzzling, and using a language that not even the best cryptographers have succeeded in deciphering. So it's no wonder that this text plays a role in Dan Brown's latest best-selling mystery, "The Lost Symbol." The Voynich Manuscript has fascinated scholars and occultists alike since its discovery 100 years ago. But no one has been able to decode its contents.

## TV Documentary by Klaus Steindl and Andreas Sulzer

"The Voynich Puzzle," a documentary made by Klaus Steindl and Andreas Sulzer for the "Universum" TV series, follows up on completely new clues to the author's identity and uses the methods of the material sciences to unlock the secret of the mysterious manuscript. The film is a co-production of the ORF – Austrian Broadcasting Company, pro omnia, ARTE and the Austrian Federal Ministry of Education, Art and Culture, and has been subsidized by the Province of Upper Austria, the City of Linz and CineStyria.

## The Voynich Manuscript in Deep Space

High-definition excerpts from the Voynich Manuscript are now part of the permanent repertoire in Deep Space at the Ars Electronica Center. These 16x9-meter images make even the most minute details visible.
