

Deep Space LIVE

Everything is Possible – The Art of Photography in the Digital Age

Thursday, November 24, 2011 / 8 PM / Ars Electronica Center Linz

(Linz, November 21, 2011) The exhibition featuring 400 of the best photos from the Trierenberg Super Circuit, the world's largest photographic art competition, is running in Linz's New City Hall until November 27th. And on November 24th at 8 PM, there's a really special visual treat in store for visitors to Deep Space LIVE. Chris Hinterobermaier, founder of the Trierenberg Super Circuit, will present spectacular competition submissions by masters of digital image processing and computer-generated photography. And they're even more breathtaking in Deep Space's 16x9-meter format.

Trierenberg Super Circuit

The Trierenberg Super Circuit was established by Chris Hinterobermaier in 1992, which means it was held for the 20th time this year. The world's largest photographic art competition attracted 85,000 submissions from 107 countries in 2011. Entrants are free to select any subject matter they want. Motif specialists can choose from among such thematic clusters as sports & dynamics, portraits, nudes, nature photography and digital image processing. Prizewinners are chosen by a jury of international experts.

Deep Space LIVE

The Ars Electronica Center is now hosting a Deep Space LIVE event every Thursday (except holidays) at 8 PM. Each presentation will feature ultra-high-definition imagery in 16x9-meter format and will be accompanied by expert commentary, entertaining stand-up repartee, and musical improvisation. Whether great works from the history of art, space travel, journeys of discovery in the Nanoworld, or a live concert is what you've come to behold, Deep Space LIVE stands for enlightening entertainment amidst breathtaking worlds of imagery. Admission is €2. Holders of a valid Museum ticket are admitted free of charge.
