

Deep Space LIVE

Climbing Elements

Thursday, December 22, 2011 / 20:00 / Ars Electronica Center Linz

(Linz, December 19, 2011) The next Deep Space LIVE event this Thursday is all about rock climbing—or bouldering, to be more precise. A 50-minute Red Bull documentary film will spotlight four-time Bouldering World Cup overall champ and multiple World & European Championship medalist Kilian Fischhuber as he adventurously plays with the elements. In addition to beholding breathtaking 16x9-meter imagery, visitors will get an up-close-and-personal look at the life of a professional climber and learn about Fischhuber's first attempted ascents as well as the challenges he's gearing up for now.

Deep Space LIVE

The Ars Electronica Center is now hosting a Deep Space LIVE event every Thursday (except holidays) at 8 PM. Each presentation will feature ultra-high-definition imagery in 16x9-meter format and will be accompanied by expert commentary, entertaining stand-up repartee, and musical improvisation. Whether great works from the history of art, space travel, journeys of discovery in the Nanoworld, or a live concert is what you've come to behold, Deep Space LIVE stands for enlightening entertainment amidst breathtaking worlds of imagery. Admission is €2. Holders of a valid Museum ticket are admitted free of charge.
