

## LabDays: The Brain

Saturday, November 26 & Sunday, November 27, 2011, 10 AM-6 PM

(November 24, 2011) Our thoughts will turn to the brain during LabDays on the weekend of November 26-27 in the Ars Electronica Center. Speeches by experts including psychoanalyst Dr. Hans-Otto Thomashoff will impart many valuable insights into our thinking apparatus, and there will be plenty of opportunities for in-depth Q&A afterwards. Throughout the weekend, visitors will also be able to control a six-legged Hexapod robot with their own brainwaves, use eye-tracking technology to witness the countless movements of their own eyes, and behold fascinating optical illusions.
