

Deep Space LIVE

Transmutations

Thursday, October 11, 2012 / 8-9 PM / Ars Electronica Center

(Linz, October 8, 2012) An experimental audiovisual performance will be the centerpiece of the next Deep Space LIVE this Thursday, October 11. Through the manipulation of a feedback loop consisting of image converters hooked up to cathode ray tube TV sets, Gregor Göttfert and Florian Voggeneder experiment with the reciprocal interplay of signal and interference, image and sound, and analog & digital visual aesthetics. The results are scanned from a monitor by a high-definition digital camera and projected onto Deep Space's walls and floor. Part 2 of the program is a showcase of experimental videos by Christoph Frey.

Deep Space LIVE

The Ars Electronica Center is now hosting a Deep Space LIVE event every Thursday (except holidays) at 8 PM. Each presentation will feature ultra-high-definition imagery in 16x9-meter format and will be accompanied by expert commentary, entertaining stand-up repartee, and musical improvisation. Whether great works from the history of art, space travel, journeys of discovery in the Nanoworld, or a live concert is what you've come to behold, Deep Space LIVE stands for enlightening entertainment amidst breathtaking worlds of imagery. Admission is €2. Holders of a valid Museum ticket are admitted free of charge.
