

Deep Space LIVE: Panoptikum

Thursday, April 25, 2013 / Ars Electronica Center Linz / 8 PM

(Linz, April 24, 2013) “Panoptikum” was a mainstay of Austria’s TV lineup for over 20 years. Now, it’s been reconceived and reformatted as a monthly online magazine in which Ars Electronica Artistic Director Gerfried Stocker, the Futurelab’s Horst Hörtnner, and Christoph Kremer, head of the Center, will present a roundup of the latest developments in art, technology, science and society in Deep Space at the Ars Electronica Center Linz. This new series premieres on April 25th at 8 PM.

Deep Space

A visit to Deep Space is a truly unforgettable experience. It’s quipped with a total of eight 1080p high-definition and active stereo-capable Barco Galaxy NH12 projectors that can display 16×9-meter, crystal-clear images on the walls and floor. Whether you’re into great works from the history of art, space travel, journeys of discovery in the nanoworld, or a 3D South Sea island for kids, there are countless realms to discover in Deep Space.
