

## Deep Space LIVE: Dreams, Illusions and Promise of Telepresence

Tuesday, June 18, 2013 / 8-9 PM / Ars Electronica Center

(Linz, June 14, 2013) Telepresence will take center stage at the next Deep Space LIVE on Tuesday, June 18, 2013 at 8 PM. Professor Henry Fuchs of the University of North Carolina at Chapel Hill will discuss whether new technologies like Microsoft Kinect and Google Glass really do deliver what has been a high-tech dream up to now: enabling people separated by great distances to interact as if they were in each other's presence. The speech will be in English.

### Deep Space LIVE

The Ars Electronica Center is now hosting a Deep Space LIVE event every Thursday (except holidays) at 8 PM. Each presentation will feature ultra-high-definition imagery in 16x9-meter format and will be accompanied by expert commentary, entertaining stand-up repartee, and musical improvisation. Whether great works from the history of art, space travel, journeys of discovery in the Nanoworld, or a live concert is what you've come to behold, Deep Space LIVE stands for enlightening entertainment amidst breathtaking worlds of imagery. Admission is €2. Holders of a valid Museum ticket are admitted free of charge.
