

Deep Space LIVE: Where the Trail Ends

Thursday, December 19, 2013 / 8-9 PM / Ars Electronica Center

(Linz, December 16, 2013) Death-defying stunts, incredible trails and breathtaking locations are in store for visitors at the next Deep Space LIVE on Thursday, December 19, 2013. "Where the Trail Ends" is a film starring some of the world's best freeriders doing their stuff in some of the world's most remote locations—the Argentine Andes and the coast of British Columbia all the way to the Gobi Desert. This Red Bull Media House and Freeride Entertainment production sets new standards in the outdoor sports film genre with extraordinary angles, impressive camera work and high-end motion picture technology.

Deep Space

A visit to Deep Space is a truly unforgettable experience. It's quipped with a total of eight 1080p high-definition and active stereo-capable Barco Galaxy NH12 projectors that can display 16x9-meter, crystal-clear images on the walls and floor. Whether you're into great works from the history of art, space travel, journeys of discovery in the nanoworld, or a 3D South Sea island for kids, there are countless realms to discover in Deep Space.
