

Exciting vacation program

## **Easter vacation at the Ars Electronica Center**

**(Linz, March 21, 2023) If you enjoy discovering, marveling and experimenting together, come on down to the Ars Electronica Center during Easter break.**

Feeding tardigrades, making "seedbombs" to green traffic islands, decorating Easter eggs with a robot, admiring sacred art in Deep Space 8k - these adventures and more are on tap at the Museum of the Future.

### **The Easter vacation program**

#### **Ding Dong**

Workshop for 9- to 11-year-olds

**Tue 4 April 2023, 13:30-16:30**

For everyone who enjoys experimenting with sounds and tones: In the Open Soundstudio, even non-instruments resound. Please bring your own "favorite thing" so it can be made to sound.

Info and registration: <https://ars.electronica.art/center/de/ferienprogramm-ding-dong-4/>

#### **NEXTCOMIC: Artivive**

Workshop from the age of 11

**Wed 5 April 2023, 14:00-16:00**

**Fri 7 April 2023, 14:00-16:00**

In this workshop, you will learn about the possibilities and applications of the augmented reality tool Artivive and use it to bring a comic to life.

Info and registration: <https://ars.electronica.art/center/de/nextcomic-workshop-artivive/>

#### **Circus Robotics**

Workshop for 9- to 11-year-olds

**Thu 6 April 2023, 13:30-16:00**

The Machine Learning Studio is home to a wide variety of machines. Young visitors get to know and control them and can also build one themselves. Manage free for the robots!

Info and registration: <https://ars.electronica.art/center/de/ferienprogramm-zirkus-robotikus-4/>

### **Family Days Easter**

**Sat 8 April 2023, 10:00-17:00**

**Sun 9 April 2023, 10:00-17:00**

Family Days Easter offers families a diverse workshop program, from exploring tiny creatures using microscopes to painting Easter eggs using robots.

Ticket prices and workshops: <https://ars.electronica.art/center/de/family-days-ostern-2023/>

### **Deep Space Lecture: The Sebastian Altar by Albrecht Altdorfer**

Art at Easter

**Tue 4 Apr 2023, 18:00-19:00**

In the early 16th century, the Regensburg painter Albrecht Altdorfer created the Sebastian Altar for the collegiate church of St. Florian - one of the most important creations of old German painting. The intense panel paintings will be impressively and expertly presented in Deep Space 8K - by theologian Dr. Michael Zugmann and art historian Dr. Lothar Schultes.
