

FamilyDays at Ars Electronica Center Linz

Saturday, May 26 & Sunday, May 27, 2012 / 10 AM-6 PM

(Linz, May 24, 2012) It's time for Family Days at the Ars Electronica Center once again this weekend. May 26-27 from 10 AM to 6 PM, we're hosting a full lineup of events including tours designed with families in mind. Youngsters—and their chaperones too—can take part in a Puzzle Rallye that gets across lots of cool stuff about the Ars Electronica Center. In Deep Space, scuba diver and underwater photographer Peter Pflügl will present astounding images of the undersea world at 4 PM both days.

Here's a program overview:

Family Tour

Saturday & Sunday 10:30 AM, 1:30 and 3:30 PM / Duration: 90 minutes

Here's something the whole family can enjoy together! A journey of discovery through the Museum of the Future opens up entertaining and, above all, astounding insights into the world we live in today—and prospects for the world of tomorrow. Among the attractions awaiting you in the new RoboLab are a telecommunications android, a baby seal robot and a designer dress that changes colors and patterns like a chameleon.

Deep Space Family

Saturday & Sunday, 11:30 AM, 1:30 and 3:30 PM / Duration: 30 minutes

Scuba diver and underwater photographer Peter Pflügl invites you to take a journey through a spectacularly beautiful submarine world. Visitors will encounter extraordinary sea creatures and learn some interesting things about how they live and behave.

Family Parcours

Saturday & Sunday, Begin at any time / Duration: about 3 hours

The Family Parcours is just the thing for folks who want to discover the Museum of the Future on their own. A parcours map and a healthy portion of curiosity are all kids and parents need on this joint outing through all the different areas of the Ars Electronica Center.
