

STUFF CHANGE AFTER SWALLOWING

MULTISPECIES METABOLIZING

LEA LUKA SIKAU

Artist-Researcher, University of Cambridge

TWO WORKS ON METABOLISM

the video work **STUFF CHANGE FEATURES ANTS AND A PAIN AU CHOCOLAT** at IT:U,

the performance **AFTER SWALLOWING SHOWS AN ENDOSCOPY WITH A CAPSULE** at Deep Space.

Guts of ants, and of our species alike, silently navigate bodies in today's world. In this intestinal loop of metabolism - from fall term to speculative futures - what does your gut rehearse to tell you? How can you sound it out in queer ways?

Funded by S+T+ARTS ReSilence, this project will be furthered by investigating ways to understand gut feeling through sonic approaches.
